

VVFC INFLUENZA VACCINE UPDATE 2006-2007 SEASON

CURRENT SHIPMENT STATUS

As of November 13, 2006, we have received and distributed approximately 100% of the vaccine for VFC children aged 6 months to 35 months and 69% of the vaccine for VFC children 36 months to 18 years. These shipments were divided proportionally among VFC providers, first filling the local health department orders in full. We do not know when we will be receiving the remainder of Virginia's allotment to ship out to our providers; however, it will be shipped immediately after we receive it.

PACKAGE SIZES DISTRIBUTED

6 months-35 months:

10 pack, 0.25mL – 1 dose syringes, preservative free, sanofi pasteur

36 months-18 years:

10 pack, 0.5mL – 1 dose vials, preservative free, sanofi pasteur

10 pack, 0.5mL – 1 dose syringes, preservative free, sanofi pasteur

5mL vial, 10 doses of 0.5mL, preservative containing, sanofi pasteur

4 years-18 years:

10 pack, 0.5mL – 1 dose vials, preservative containing, Chiron/Novartis

If you are interested in receiving any of this product, please email vvfc@vdh.virginia.gov to get on the waiting list. The product has been received and will be shipped out shortly. You will receive an email response confirming the receipt of your order; however, we will be unable to notify you of the number of doses you will be receiving. It will be shipped in one total shipment.
